

END-TO-END eDISCOVERY SOLUTIONS YOU CAN COUNT ON.

Evolver Legal Services offers end-to-end eDiscovery solutions to law firms and corporations to help meet the demands of the legal discovery process. The effort to respond to an eDiscovery request is often labor intensive and expensive due to the volume of information stored in electronic form. We help handle the explosion of electronic data and new legal regulations that are putting firms at risk when involved in eDiscovery related matters. We are committed to providing you with accurate, defensible solutions – regardless of the size of the case, the size of the data set or the complexity of the project.

THE DIFFERENCE IN EVOLVER LEGAL SERVICES. people. technology. experience.

PROVEN, TRUSTED PARTNER

As a trusted partner to our clients, we take a consultative approach, understanding your specific needs and guiding you through the complex technologies and challenges faced during the eDiscovery process.

FULL EDMR LIFECYCLE SUPPORT

Our experienced team is skilled across the full EDMR lifecycle. We provide consulting and project management through every phase with a core focus on collection, processing, analysis, review, and production engagements. In addition to our discovery solutions, we offer litigation readiness consulting, expert testimony, and have extensive resources dedicated to forensics investigations.

PROJECT MANAGEMENT THAT MAKES A DIFFERENCE

Our project management approach combines extensive project planning, a solid understanding of the technology required for the project, and a commitment to quality, while keeping your costs under control. We have a set of standard processes that are used for each and every project. This ensures that our projects are scoped and delivered on time and within budget – every time.

CUSTOM SOLUTIONS

While many providers can assist with standard ESI processing and review, very few are capable of developing successful outside-the-box solutions. Our combination of IT technology experience and custom development resources puts us in a unique position to solve our client's specific needs, even when those needs go outside of the norm. Two examples of our custom solutions are *SDRP*, our tool for reviewing structured data, and *Insight*, our case management system.

TECHNICAL & LEGAL PERSPECTIVE INTO YOUR CASE

We understand your data from a technical and legal perspective. We have a unique combination of legal, technology, and data management experts that provide insight and perspective into your practice that other eDiscovery providers simply can't match.

TECHNOLOGY EXPERTISE

As a division of Evolver, Inc., an established leader in providing IT services to the federal and commercial markets, our foundation is in technology. Our depth and range of expertise is unparalleled with over two hundred technologists on staff spanning the IT spectrum including: infrastructure engineering, application systems engineering, data management, end user support, and the EDMR lifecycle.

DATA CENTER FACILITY

Our state-of-the-art data center meets the demanding security and compliance requirements of your organization. It is an ISO 27001 certified and security compliant, SSAE16 SOC-1 Type II certified, N+1 redundant data center for high-reliability access and performance.
